FOR IMMEDIATE RELEASE

Signature Control Systems Expands Offices & Manufacturing
Company is experiencing rapid growth in all sectors

IRVINE, CA (July 2, 2008) - Signature Control Systems, Inc. has strengthened its manufacturing and development capabilities by adding 30,000 square feet of additional manufacturing and office space in Irvine, California.

Signature has added the additional address of 1 Mason to their current address of 4 Mason. The building at 1 Mason will hold the executive staff, marketing, customer service and finance, plus accommodate all the rotor product development, testing, and rotor assembly. The building at 4 Mason will remain as the facility for software and product development, and assembly and testing of field controllers and vehicle products.

“We have been growing rapidly in all market segments worldwide, plus the various product line expansions presented numerous challenges to our ability to fit it all under one roof. Basically, we were bursting at the seams!” says Brian J. Smith, President and CEO of Signature.

“As our global customer base is growing rapidly, it is now the right time for our company to take a further step by adding additional facilities and resources,” says Smith. “The added space allows us room to grow. We have literally hundreds of ideas and things we want to produce – and now we have the room to do it.”
