

Setting Up a Basic Program

Setting Up a Basic Program

Step 1:

The screenshot shows the 'SITE DASHBOARD OVERVIEW' interface. At the top, there's a 'Site' dropdown menu set to 'My Site'. Below it are tabs for 'My Devices: Tree View' and 'My Weather'. A large black arrow points to the 'Name' column header of a table. The table has columns for 'Name', 'Status', 'Attributes', and 'Shortcuts'. The first row in the table is 'Controller in the Garage' with an information icon. The 'Status' column shows a green signal icon, 'Attributes' shows two icons, and 'Shortcuts' shows a green checkmark icon. At the bottom right of the row are delete and edit icons.

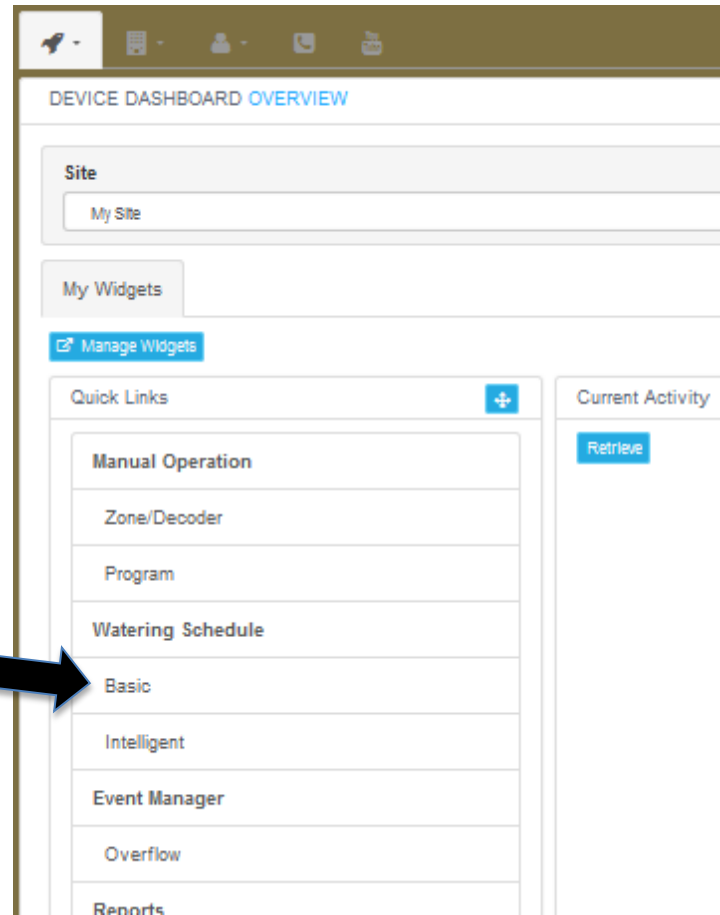

Name	Status	Attributes	Shortcuts
Controller in the Garage			

From the “Site Dashboard” page Click on the name of your controller

Setting Up a Basic Program

Step 2:

Click on “Basic” in the drop down menu.

Setting Up a Basic Program

Step 3:

Select and name the program you wish to set, the valves to assign, the days of the week to water, start times and run times.

Click “Apply” to save your new settings
